PaymentGateways				

PROJECTS

JobMatch

JobMatch : is a web-based platform developed to bridge the gap between blue-collar workers and households seeking reliable service providers. Built using Laravel RestFull APIs, the system automates job matching by connecting workers such as plumbers, electricians, cleaners, and handymen with nearby clients in need of their services .(repo)

HealthConsulatncy

HealthConsultancy : is a backend system designed to power an online medical consultation platform that connects patients with certified doctors and healthcare professionals.Developed using Laravel, API-driven architecture to support secure and efficient interactions between users. (repo)

NovaPad

Novpad : fast and lightweight note-taking web application built for users who value simplicity and focus. Developed using Core PHP for the backend and React with TypeScript on the frontend, Novpad allows users to create, edit, and organize notes seamlessly with a clean and responsive powered by Tailwind CSS. (repo)
